# POLLINATORS OF PENNSYLVANIA

Hand-lettered and illustrated poster with examples of native pollinators. Procreate, Photoshop.

# Pollinators of Pennsylvania

**Yellow Banded Bumble Bee**  
A declining population means the YBBB needs undisturbed habitats near abundant nectar sources.

**Frosted Elfin**  
Almost all FE habitats have been destroyed. They require dry, open woods and large patches of larval host plants and adult nectar plants.

**Rusty Patched Bumble Bee**  
The first insect in North America to be federally listed as endangered. Native to PA but missing for seven years.

**Regal Fritillary**  
Only one population left in PA. Requires violets for larvae, nectar plants for adults, and native grasses for protection.

**Monarch Butterfly**  
Loss of habitat has caused a 90% population decrease. Provide at least two forms of milkweed to encourage Monarchs.
